

# Current Work

- Started implementing the application and algorithm
- Starting writing the Final Report
- Working on reformatting the report

# Problems

- What to write in each section of report?
- How much detail do I need to describe the application in the report?
- Should I write everything that is to do with application in the Evaluation and Implementation Chapters
- How to reference each source used?

## Next Part

- How to do the testing?
- How much testing do I need to do?
- After Testing, do I need to write evaluation base on it?
- Carry on with finishing the implementation
- Continue working on the Final Report
